AGRICULTURAL DEPARTMENT.

From M.S. Sivaraman Esq, I.C.S.
Director of Agriculture,
Chepauk, Madras.

To The Secretary to Government,
Development Department,
M A D R A S.

No. P.1. 1042/47 dated 3-12-1947.

Sir,

Sub:- Books and Publications- Exhange of publications Supply to the University of Agricultural Sciences Horticultural and Viticultural Faculty XII Higegkuti Vt 23, Dudapest, Hungary.

*****

I enclose herewith a copy of the letter from the Professor of Agricultural Engineering, Dean of the Faculty, University of Agricultural Sciences, Horticultural and Viticultural Faculty XII Agricultrual College and Research Insitute, Coimbatore for Government's perusal and orders. The Professor of the Institute represents that they have been completely ruined by the War and their entire library has been destroyed during the siege of Budapest and that they are so very poor now, that they can make use of anything that this department can send them.

2. The institute has not been on our exchange miling list so far, but desires to start exchange relations with this Department for our publications and also wished to have anything this Department can send them to start with.

3. The Principal, Agricultural College, Coimbatore who was consulted in the matter has furnished a list of publications, reports, bulletin etc. which could be conveniently spared gratis to the institute if approved. a copy of the list is herewith furnished. The Principal also recommends that when printing the Separates of the reports of Agricultural Research Stations is resumed, the reports of Fruit Specialist, Kodur and other Fruit Research Stations in the Province might be sent in exchange. At present separates of the reports of the Agricultural Research Stations are not printed but only limited number of copies of bound volumes containing the reports of all stations are published. As such, copies of the annual reports need not be supplied at present. The question of entering into regular exchange relations with the University of Agricultural Sciences Horticultural and Viticultural Faculty XII, Hidegkuti Vt. 23, Budapest also can be considered after some time whether institute would be in a position to send out useful publications abroad. I request that Government may be pleased to sanction the free supply of the publications mentioned in the Principal list to the institute.

V. Seetharama Servai.

For Director of Agriculture,

Office of the Director of Agriculture,
Chepauk, Madras dated 8-12-1947.

Copy of letter No. K/F6/1947 dated March 28th 1947 from the Professor of Agricultural Engineering, Dean of the Faculty, University of Agricultural Sciences Horticultural and Viticulcultural Faculty XII H idegkuti yt 23. BUDAPEST, Hungary to the Agricultural College and R esearch Institute, Coimbatore.

******

Since the Beginning of the war our University lost all of its connections with the foreign scientific life, with which our Faculty the former Horticultural and Vitucultural College of Hungary was in connection for many years. Now we try to renew the lost connections and make new ones if it is possible at all.

In a separate package we mailed our latest yearbook for you, hoping, that you want of exhange your publications with us too. Our next year book is coming soon. In this all the publications will be made with a summary written in English language.

We are completely ruined by the War. All the buildings of our Faculty have been destroyed during the siege of Budapest, consequently the greatest part of our equipment and library got lost too. We are very poor now, so we can use anything you are able to send to us. Therefore you are requested, kindly send a copy of all your available publications, not only of the new ones, but of the olders too.

Beside the horticultural and viticultural sciences we are interested in the fundamental sciences too, further more in agricultural crop production and practices, in agriculture and also in the agricultural engineering line.

Everything you send, will be greatly appreciated by us.

Beside your Institute we sent our yearbook to agriculture college, Lyallpur, College of Agriculture, Poona, University of Bombay, Government Agricultural College, Cawnpore . We ask you to inform us, whether are there any other institution in your country which are interested in this line resp. which want to exchange their publications with us.

Hoping that the connections will be a very useful too for both of us, and waiting your answer.

Sd.
for Director of Agriculture
